Child and Adolescent Mental Health

December 9, 2008

Hi

I have recently applied for a post in a child and adolescent inpatient unit in the UK and would welcome some advice on appropriate MOHO assessment tools. I would also be interested to hear your experiences of working in this setting. I currently work in Recovery community mental health services and have experience of using the MOHOST, OCAIRS, OSA and VQ. I look forward to hearing from you.

Regards

Ruth Taylor

December 16, 2008

Hi Ruth,

I work on an inpatient adolescent unit for 12 -18 years olds. I use the MOHOST, OCARIS , Interest checklist OSA and occasionally the OPHII. They all work well with this age group, and I have found them useful tools in assessment and treatment. If you would like to contact me to discuss anything further then just email me and I will give you a cal or give you my contact details.

Samantha
